The duration of Diploma in Medical Laboratory Technology is generally two years, but it depends mainly on the criteria prescribed in different institutes in India.

• RADIOLOGY TECHNICIAN

Radiology technicians produce clear and accurate images of the body, enabling physicians to diagnose and treat medical conditions that would otherwise be difficult to document. Technicians operate sophisticated equipment that includes X-ray, mammography, computerized axial tomography (CAT) and positron emission tomography (PET) scan devices. By guiding patients through each step of their medical imaging procedures, these specialists ensure the production of high quality images.

• MPHWH

Multi Purpose Health Worker is a medical level course. The degree course takes around 2-year and its syllabus is divided into 4- semesters of six months each. The program involves pharmacy, psychology, medicine, surgery, dentistry, midwifery, nursing or allied health professions. It provides treatments connected to health problems in an emergency or in a disaster where the hospitals and medical facilities are not available. In a developing nation like India,

optimum health of the citizens cannot be attained without the involvement of willing, trained and health-conscious people. Candidates have various job opportunities after its successful completion. The course syllabus provides study related to Health Worker.

• CMD

Role of Medical dresser in primary health care is nursing of the patient with the help of nurses & midwife. They support primary health care. Primary health care goes beyond the conventional health services in that, it is based on community participation and individual self-reliance for health development. PPI in addition to core clinical skills and a sound knowledge of specialist equipment and drugs provides the students with the ability to reassure and support patients emotionally through the stressful experience of surgery.

● DEPARTMENT OF NURSERY TEACHER'S TRAINING

A course also known as NTT is a diploma course for teachers who want to teach and cater to the student at nursery level or pre-primary level. This teacher workforce has to undergo the training of the general TT course where the teacher joins the workforce of several other pre-school teachers. The NTT course helps the students who aim to be pre-school teachers in order to facilitate young minds of nursery children. The course provides various methodologies to the teachers who undergo this TT course which is required in teaching the young students that will be essential in the physical, cognitive and social development. There are also several methodologies which are taught to the teachers to better understand their job roles and enact them in life. Some of the important subjects taught are instructional strategies, child psychology, classroom management and cognitive development. There are certain standards in NTT course like that of national and international standards which are highlighted in the course fees of various institutes.

The teachers are enlightened with all subjects and communication at nursery level which are better understood by young minds. Teachers need the best training methodologies as it is important to ensure that the basics of the student, who has just stepped into the world of formal education, are clear. The teachers are seen to be role models in molding morals, habits and character into these young minds and therefore require utmost communication skills in order to be an accomplished Nursery teacher.

● NATURE OF JOBS/ROLES, GROWTH PROSPECTUS & SALARIES

The job opportunities for the Diploma holders in NTT training are very specific like that of Nursery in-charge, Nursery Teacher, or nursery department coordinator. There are further prospects for the diploma holders to study further in Masters of TT training, PG in Pre-school teacher training/primary school teacher training or can continue with their job opportunities in schools and pre-schools. The students of NTT also have opportunities in colleges where they themselves can teach and provide NTT training to students. Nursery blocks also provide employment to NTT students as Nursery teachers, Madam, In-charge or helper, Nursery Manager, Assistant pre-primary teacher, NTT/B.Ed Teacher and also as Home Tutors. The salaries provided to the NTT students are very area-specific depending upon whether they are working in an urban or rural demographic. The level of operation and expertise of the diploma holders also become one of the reasons for specifying their salary. International schools provide good salaries but ultimately a more experienced teacher gets paid more than fresher's. The table below shows some of the salary statistics and position of NTT diploma holders after TT training.

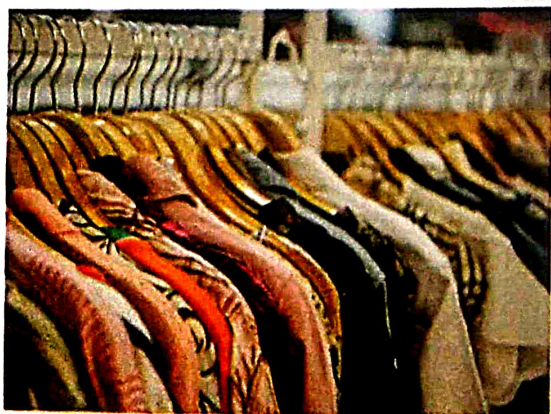

● DEPARTMENT OF AGRICULTURE

Agriculture is an academic discipline of science that involves the study of various scientific, technical and business subjects related to agriculture, horticulture, farm manager, poultry faeming, dairy farming, agricultural biotechnology etc. The scope of a career in Agriculture has grown tremendously in recent times with cutting-edge research and continue innovation in the industry with a bachelor's or master's degree in agriculture, students can secure high pain jobs in both government and private sector. They can be appointed as agriculture research scientists, agriculture officers, production manager, farm manager and so on. Interested students can also opt for job in the field of teaching, banking and insurance.

● DEPARTMENT OF FIRE SAFETY

Fires destroy property, cause injuries, and take lives. A fire in the workplace can also mean the termination of jobs, as many of the offices and factories destroyed by fire in Canada are never rebuilt. One of the key strategies to maintaining a safe workplace and preventing fires is fire safety training. With proper training workers can eliminate fire hazards and respond quickly and efficiently if a fire breaks out. Without proper training a small occurrence can quickly grow to become a major incident with devastating outcomes. Fire safety training can teach workers how to recognize fire hazards, conduct a fire safety risk assessment, prevent a workplace fire, and respond if a fire occurs.
